

**Список публикаций ведущей организации  
Национальный исследовательский центр "Курчатовский институт"  
Федеральное государственное бюджетное учреждение Петербургский  
институт ядерной физики им. Б.П. Константинова**

1. Ginzburg, S. L., A. V. Nakin, and N. E. Savitskaya. "Effect of the structure of a complex network on the properties of the dynamical processes on it." JETP letters **90**, 775 (2010).
2. Kibalin, Y. A., I. V. Golosovsky, Y. A. Kumzerov, V. Y. Pomjakushin, A. A. Bosak, and P. P. Parshin. "Neutron diffraction study of gallium nanostructured within a porous glass." Physical Review B **86**, 024302 (2012).
3. Utesov, O. I., A. V. Sizanov, and A. V. Syromyatnikov. "Localized and propagating excitations in gapped phases of spin systems with bond disorder." Physical Review B **90**, 155121 (2014).
4. Yashenkin, A. G., O. I. Utesov, A. V. Sizanov, and A. V. Syromyatnikov. "Self-consistent T-matrix approach to Bose-glass in one dimension." Journal of Magnetism and Magnetic Materials **397**, 11 (2016).
5. Parshin, P. P., M. G. Zemlyanov, G. Kh Panov, A. A. Shikov, A. A. Naberezhnov, Yu A. Kumzerov, I. V. Golosovsky, and A. S. Ivanov. "Atomic dynamics of lead embedded into nanoporous glass." Journal of Experimental and Theoretical Physics **111**, 996 (2010).
6. Ginzburg, S. L., and O. V. Gerashchenko. "A study of stochastic resonance in a bistable system with double stochasticity." Journal of Experimental and Theoretical Physics **97**, 826 (2003).
7. Ståring, Johan, Bernhard Mehlig, Yan V. Fyodorov, and J. M. Luck. "Random symmetric matrices with a constraint: The spectral density of random impedance networks." Physical Review E **67**, 047101 (2003).
8. Golosovsky, I. V., O. P. Smirnov, R. G. Delaplane, A. Wannberg, Y. A. Kibalin, A. A. Naberezhnov, and S. B. Vakhrushev. "Atomic motion in Se nanoparticles embedded into a porous glass matrix." The European Physical Journal B-Condensed Matter and Complex Systems **54**, 211 (2006)
9. Fyodorov, Y. V., H-J. Sommers, and Ian Williams. "Density of stationary points in a high dimensional random energy landscape and the onset of glassy behavior." JETP Letters **85**, 261 (2007).
