

**Список публикаций официального оппонента
Андроненко Сергея Ивановича**

1. **S.I. Andronenko**, A.A. Rodionov, A.V. Fedorova, S.K. Misra, Electron Paramagnetic Resonance study of $(\text{La}_{0.33}\text{Sm}_{0.67})_{0.67}\text{Sr}_{0.33-x}\text{Ba}_x\text{MnO}_3$ ($x < 0.1$): Griffiths phase, Journal of Magnetism and Magnetic Materials, **326**, p. 151-156, 2013.
2. S.K. Misra, **S.I. Andronenko**, J.D. Harris, A. Thurber, G.L. Beausoleil II and A. Punnoose, Ferromagnetism in Annealed $\text{Ce}_{0.95}\text{Co}_{0.05}\text{O}_2$ and $\text{Ce}_{0.95}\text{Ni}_{0.05}\text{O}_2$ Nanoparticles. J. Nanosci. Nanotechnol., 2013, **13**, n. 10, p. 6798-6805.
3. S.K. Misra, **S.I. Andronenko**, A. Thurber, A. Punnoose, A. Nalepa, An X- and Q-band Fe^{3+} EPR Study of Nanoparticles of Magnetic Semiconductor $\text{Zn}_{1-x}\text{Fe}_x\text{O}$, JMMM, **363**, p. 82-87, 2014.
4. **S.I. Andronenko**, Spin relaxation of Mn ions in rare earth manganites in paramagnetic region, Magnetic Resonance in Solids, Electronic Journal, **16**, n. 2, 14207 (5 p.), 2014.
5. **S.I. Andronenko**, S.K. Misra, A review of EPR investigations of nanoparticles of dilute magnetic semiconductors doped by transition metal ions, Applied Magnetic Resonance, **46**, n.6, pp. 693-707, 2015,
6. S.K. Misra, **S.I. Andronenko**, S. Srinivasa Rao, Jordan Chess, A. Punnoose, An X-band Co^{2+} EPR study of $\text{Zn}_{1-x}\text{Co}_x\text{O}$ ($x = 0.005 - 0.1$) nanoparticles prepared by chemical hydrolysis methods using diethylene glycol and denaturated alcohol at 5 K, JMMM, **394**, p. 138-142, 2015.
7. S.K. Misra, **S.I. Andronenko**, D. Tipikin, J.H. Freed, V. Somani, Om Prakash, Study of paramagnetic defect centers in as-grown and annealed TiO_2 anatase and rutile nanoparticles by a variable-temperature X-band and high-frequency (236 GHz) EPR, JMMM, **401**, p. 495-505, 2016.
8. **S.I. Andronenko**, A.A. Rodionov, S.K. Misra, A variable temperature X- and W-band EPR study of Fe-doped SiCN ceramics annealed at 1000° C, 1100° C, and 1285° C: dangling bonds, ferromagnetism and superparamagnetism, Applied Magnetic Resonance, **49**, iss. 4, pp. 335-344, 2018.
9. S.K. Misra, **S.I. Andronenko**, EPR of the V^{4+} ion in single crystals of pyrovanadates $\beta\text{-Mg}_2\text{V}_2\text{O}_7$, $\alpha\text{-Zn}_2\text{V}_2\text{O}_7$: Spin-Hamiltonian parameters, Magnetic Resonance in Solids, Electronic journal, **20**, N.1, 18101 (8pp), 2018.
10. S.K. Misra, **S.I. Andronenko**, Chapter 10, “EPR and FMR of SiCN ceramics and SiCN magnetic derivatives” in eBook: “EPR in modern carbon-based materials”, 2017, eBook series: “Frontiers in Magnetic Resonance”, v. 1, pp. 197-224, 2018, Bentham Science STM-publisher.
11. S.K. Misra, **S. Andronenko**, I. Gilmutdinov, R. Yusupov, EPR and magnetization studies of polymer-derived Fe-doped SiCN nanoceramics annealed at various temperatures: blocking temperatures, superparamagnetism and size distribution, Applied Magnetic Resonance, **49**, iss.12, pp. 1397-1415, 2018.
