

**Список основных публикаций официального оппонента Фельдмана В.И. по тематике диссертации Дмитриева Ю.А. за последние 5 лет**

1. V. I. Feldman. EPR and IR Spectroscopy of Free Radicals and Radical Ions Produced by Radiation in Solid Systems. In: *Applications EPR in Radiation Research*, edited by A. Lund and M. Shiotani. Springer, **2014**, pp. 151-188. DOI: [10.1007/978-3-319-09216-4\\_5](https://doi.org/10.1007/978-3-319-09216-4_5)
2. S. V. Ryazantsev, V. I. Feldman. Matrix-Isolation Studies on the Radiation-Induced Chemistry in H<sub>2</sub>O/CO<sub>2</sub> Systems: Reactions of Oxygen Atoms and Formation of HOCO Radical. *J. Phys. Chem. A.*, **2015**, 119, pp. 2578–2586. DOI: [10.1021/jp509313n](https://doi.org/10.1021/jp509313n)
3. S. V. Ryazantsev, V. I. Feldman. Radiation-induced transformations of matrix-isolated formic acid: evidence for the HCOOH → HOCO + H channel. *Phys. Chem. Chem. Phys.* **2015**, 17, pp. 30648–30658. DOI: [10.1039/C5CP05446J](https://doi.org/10.1039/C5CP05446J)
4. S. V. Kameneva, D. A. Tyurin, V. I. Feldman. Structure and properties of the radiation-induced intermediates produced from HCN in noble gas matrices. *Radiat. Phys. Chem.*, **2016**, 124, pp. 30–37. DOI: [10.1016/j.radphyschem.2015.12.001](https://doi.org/10.1016/j.radphyschem.2015.12.001)
5. S. V. Kameneva, D. A. Tyurin, K. B. Nuzhdin, V. I. Feldman. Matrix isolation and *ab initio* study on HCN/CO<sub>2</sub> system and its radiation-induced transformations: Spectroscopic evidence for HCN···CO<sub>2</sub> and *trans*-HCN···CO<sub>2</sub> complexes. *J. Chem. Phys.*, **2016**, 145, 214309. DOI: [10.1063/1.4969075](https://doi.org/10.1063/1.4969075)
6. V. I. Feldman, S. V. Ryazantsev, E. V. Saenko, S. V. Kameneva, E. S. Shiryaeva. Matrix isolation model studies on the radiation-induced transformations of small molecules of astrochemical and atmospheric interest. *Radiat. Phys. Chem.*, **2016**, 124, pp. 7–13. DOI: [10.1016/j.radphyschem.2015.12.005](https://doi.org/10.1016/j.radphyschem.2015.12.005)
7. S. V. Ryazantsev, D. A. Tyurin, V. I. Feldman. Experimental determination of the absolute infrared absorption intensities of formyl radical HCO. *Spectrochim. Acta A Mol. Biomol. Spectrosc.* **2017**, 187, pp. 39–42. DOI: [10.1016/j.saa.2017.06.018](https://doi.org/10.1016/j.saa.2017.06.018)
8. S. V. Ryazantsev, V. I. Feldman, L. Khriachtchev. Conformational Switching of HOCO Radical: Selective Vibrational Excitation and Hydrogen-Atom Tunneling. *J. Am. Chem. Soc.* **2017**, 139, pp. 9551–9557. DOI: [10.1021/jacs.7b02605](https://doi.org/10.1021/jacs.7b02605)
9. S. V. Ryazantsev, L. Duarte, V. I. Feldman, L. Khriachtchev. VUV photochemistry of the H<sub>2</sub>O···CO complex in noble-gas matrices: formation of the OH···CO complex and the HOCO radical. *Phys. Chem. Chem. Phys.* **2017**, 19, pp. 356–365. DOI: [10.1039/C6CP06954A](https://doi.org/10.1039/C6CP06954A)
10. S.V. Ryazantsev, P.V. Zasimov, V.I. Feldman. X-ray radiolysis of C<sub>2</sub> hydrocarbons in cryogenic media. *Radiat. Phys. Chem.* **2018**, 151, pp. 253–260. DOI: [10.1016/j.radphyschem.2018.06.005](https://doi.org/10.1016/j.radphyschem.2018.06.005)
