

Список избранных публикаций оппонента Карпова С.Ю.

1. S. Nikishin, A. Bernussi and S. Karpov, "Towards Efficient Electrically-Driven Deep UVC Lasing: Challenges and Opportunities", *Nanomaterials*, **13**, 185 (2023).
2. Р. А. Мастеров и С. Ю. Карпов, "Модифицированная теория связанных волн и численный метод для анализа брэгговских зеркал с произвольным профилем показателя преломления", *ЖТФ* **91**, 1997-2007 (2021).
3. I. Reklaitis, L. Krencius, T. Malinauskas, S. Yu. Karpov, H. J. Lugauer, I. Pietzonka, M. Strassburg, P. Vitta, and R. Tomašiūnas, "Time of carrier escape and recombination coefficients in InGaN quantum-well active regions of blue, cyan, and green light-emitting diodes", *Semicond. Sci. Technol.* **34**, 015007 (2019).
4. F. Nippert, S. Yu. Karpov, G. Callsen, B. Galler, T. Kure, C. Nenstiel, M. R. Wagner, M. Straßburg, H.-J. Lugauer, and A. Hoffmann, "Temperature-dependent recombination coefficients in InGaN light-emitting diodes: hole localization, Auger processes and the green gap", *Appl. Phys. Lett.* **109**, 161103 (2016).
5. M.E. Rudinsky, S.Yu. Karpov, H. Lipsanen, and A.E. Romanov, "Critical thickness and bow of pseudomorphic $\text{In}_x\text{Ga}_{1-x}\text{As}$ -based laser heterostructures grown on (001)GaAs and (001)InP substrates", *Material Physics & Mechanics*, **24** (2015) 278-283.
6. Д. М. Демидов, А. Л. Тер-Мартirosян, К. А. Булашевич, О. В. Хохлев, С. Ю. Карпов, "Мощные лазерные диоды с длиной волны излучения 808 нм. III. Пути повышения мощности излучения", *Научное приборостроение* **23** (2013) 19-25.
7. К. А. Bulashevich, I. Yu. Evstratov, S. Yu. Karpov, O. V. Khokhlev, and A. I. Zhmakin, "Modelling of Widebandgap Light Emitting Diodes", In: *Light-Emitting Diodes and Optoelectronics: New Research*, Eds. J. T. Hall and A. O. Koskinen, Nova Science Publishers, Ch.9 (2012) 231-286.
8. M. V. Durnev, A. V. Omelchenko, E. V. Yakovlev, I. Yu. Evstratov, and S. Yu. Karpov, "Indium Incorporation and Optical Transitions in InGaN Bulk Materials and Quantum Wells with Arbitrary Polarity", *Appl. Phys. Lett.* **97** (2010) 051904.
9. S. Nikishin, B. Borisov, V. Mansurov, M. Pandikunta, I. Chary, G. Rajanna, A. Bernussi, Yu. Kudryavtsev, R. Asomoza, K. A. Bulashevich, S. Yu. Karpov, S. Sohal, and M. Holtz, "Short period p-type AlN/AlGaIn superlattices for deep UV light emitters", *MRS Symp. Proc.* **1202** (2010) 1202-I10-03.
10. K. A. Bulashevich, M. S. Ramm, and S. Yu. Karpov, "Effects of electron and optical confinement on performance of UV laser diodes", *Phys. Stat. Solidi (c)* **6** (2009) 603-606.
11. S. Yu. Karpov, "Bandgap Engineering of III-Nitride Devices on Low-Defect Substrates", In: *III-Nitride Devices and Nanoengineering*, Ed. Zhe Chuan Feng, Imperial College Press, London, Ch.13 (2008) 367-398.
12. K. A. Bulashevich, V. F. Mymrin, and S. Yu. Karpov, D M Demidov, and A L Ter-Martirosyan, "Effect of Free-Carrier Absorption on Performance of 808 nm Al-GaAs-Based High-Power Laser Diodes", *Semicond. Sci. Technol.* **22** (2007) 502-510.
