

**Список работ официального оппонента
доктора физико-математических наук
ведущего научного сотрудника, СПбПУ Петра Великого
Кавеевой Елизаветы Геннадьевны по диссертации Солохи В.В.**

1. Kaveeva, Elizaveta, et al. "Predictive modeling of the JET D–T plasma boundary." Contributions to Plasma Physics 64.7-8 (2024): e202300118.
2. Rozhansky, V. A., A. A. Shirobokov, and E. G. Kaveeva. "Control of edge plasma by plate biasing in SOLPS-ITER modeling." Contributions to Plasma Physics (2024): e202300122.
3. Senichenkov, Ilya, et al. "First results of EAST edge modeling with SOLPS-ITER 3.2. 0 on Extended Grid." Contributions to Plasma Physics (2024): e202300136.
4. Baranovsky, I., E. Kaveeva, and V. Rozhansky. "Plasma dynamics and collisional magnetic presheath structure in unmagnetized divertor plasma in fusion devices." Physics of Plasmas 31.6 (2024).
5. Orrico, Christopher A., et al. "Evaluation of ITER divertor shunts as a synthetic diagnostic for detachment control." Nuclear Fusion 63.8 (2023): 086002.
6. Kaveeva, E., and V. Rozhansky. "Analysis of radial electric field in the scrape-off layer in SOLPS-ITER modeling of ASDEX-upgrade and ITER." Plasma Physics and Controlled Fusion 65.5 (2023): 055020.
7. Korzueva, V., et al. "SOLPS-ITER modeling of EU-DEMO Ar-seeded cases with drifts and kinetic neutrals." Plasma Physics and Controlled Fusion 65.8 (2023): 085009.
8. Vekshina, E., et al. "Experiment with nitrogen seeding at the Globus-M2 tokamak." Physics of Plasmas 30.4 (2023).
9. Senichenkov, I. Yu, et al. "SOLPS-ITER modeling of Ar and N seeded discharges in ASDEX upgrade and ITER." Nuclear Materials and Energy 34 (2023): 101361.
10. Kaveeva, E., et al. "SOLPS-ITER modeling of deuterium throughput impact on the ITER SOL plasma." Nuclear Materials and Energy 35 (2023): 101424.
11. Senichenkov, I. Yu, et al. "SOLPS-ITER modeling of CFETR advanced divertor with Ar and Ne seeding." Nuclear Fusion 62.9 (2022): 096010.
12. Makarov, S. O., et al. "Impact of the improved parallel kinetic coefficients on the helium and neon transport in SOLPS-ITER for ITER." Contributions to Plasma Physics 62.5-6 (2022): e202100165.

13. Poletaeva, A., et al. "Simple model for tokamak outer midplane electron temperature profile in scrape-off-layer verified by SOLPS-ITER simulations." *Plasma Physics and Controlled Fusion* 64.10 (2022): 105020.
14. Senichenkov, Ilya, et al. "Detached regime with highly radiating X-point: Physics and modelling." *Contributions to Plasma Physics* 62.5-6 (2022): e202100177.
15. Vekshina, Elena, et al. "SOLPS-ITER EU-DEMO modelling with drifts and kinetic neutrals." *Contributions to Plasma Physics* 62.5-6 (2022): e202100176.
16. Rozhansky, V., et al. "Transport in the tokamak-reactor edge plasma with strong collisionality." *Nuclear Materials and Energy* 33 (2022): 101316.
17. Rozhansky, V., et al. "Multi-machine SOLPS-ITER comparison of impurity seeded H-mode radiative divertor regimes with metal walls." *Nuclear fusion* 61.12 (2021): 126073.
18. Senichenkov, I. Yu, et al. "Approaching the radiating X-point in SOLPS-ITER modeling of ASDEX Upgrade H-mode discharges." *Plasma Physics and Controlled Fusion* 63.5 (2021): 055011.
19. Rozhansky, V., et al. "Current structure in the scrape-off layer of a tokamak in a quiescent state." *Plasma Physics and Controlled Fusion* 63.1 (2020): 015012.
