

д.ф.-м.н. **Чернов Александр Игоревич** гнс, зав. лаб. Физики магнитных гетероструктур и спинтроники для энергосберегающих информационных технологий МФТИ, Научный руководитель группы Квантовая спинтроника и низкоразмерные материалы Российский квантовый центр.

Список работ по теме диссертации:

1. Ignatyeva, Daria O. and Krichevsky, Denis M. and Karki, Dolendra and Kolosvetov, Anton and Zimnyakova, Polina E. and Shaposhnikov, Alexander N. and Berzhansky, Vladimir N. and Levy, Miguel and Chernov, Alexander I. and Belotelov, Vladimir I. Optical excitation of multiple standing spin modes in three-dimensional optomagnonic nanocavities. *Phys. Rev. Applied* 21, 034017 – Published 11 March, 2024 <https://doi.org/10.1103/PhysRevApplied.21.034017>
2. Krichevsky, Denis M., Ozerov, Vladislav A., Bel'kova, Alexandra V., Sylgacheva, Daria A., Kalish, Andrey N., Evstigneeva, Svetlana A., Pakhomov, Alexander S., Mikhailova, Tatiana V., Lyashko, Sergey D., Kudryashov, Alexander L., Semuk, Evgeny Yu., Chernov, Alexander I., Berzhansky, Vladimir N. and Belotelov, Vladimir I.. "Spatially inhomogeneous inverse Faraday effect provides tunable nonthermal excitation of exchange dominated spin waves" *Nanophotonics*, vol. 13, no. 3, 2024, pp. 299-306. <https://doi.org/10.1515/nanoph-2023-0626>
3. O. Borovkova, A. Kolosvetov, A. Kalish, A. Chernov, V. Belotelov; Patterned magnetophotonic crystal for all-optical magnetization precession generation. *Appl. Phys. Lett.* 22 January 2024; 124 (4): 042402. <https://doi.org/10.1063/5.0188827>
4. A.A. Kolosvetov, M.A. Kozhaev, I.V. Savochkin, V.I. Belotelov, and A.I. Chernov Concept of the Optomagnonic Logic Operation *Phys. Rev. Applied* 18, 054038 (2022) <https://doi.org/10.1103/PhysRevApplied.18.054038>
5. Polulyakh, S.N., Berzhanskii, V.N., Semuk, E.Y. et al. Magnetoelastic Coupling Modulation at Ferromagnetic Resonance in Garnet Ferrite Films. *Tech. Phys.* 66, 1011–1017 (2021). doi:10.1134/S1063784221070112
6. Chernov, A. I., M. A. Kozhaev, and V. I. Belotelov. Tunable Generation of Spin Waves by Ultrashort Optical Pulses in Magnetic Dielectric Thin Films. *Optomagnonic Structures: Novel Architectures For Simultaneous Control Of Light And Spin Waves*, pp. 135-174. (2021). doi:10.1142/9789811220050_0003
